## 1. Almaden Valley and Cross Valley Pipeline Inspection and Repair Safety Support

Valley Water is working on the Almaden Valley Pipeline and Cross Valley Pipeline inspection and repair projects. Valley Water held training sessions in order to prepare for safe entry into the pipelines. These pipelines are identified as permit required confined spaces, which requires internal atmospheric testing and continuous monitoring, adequate communications, and stand-by rescue teams in the event of an emergency; additionally, the pipelines need to be effectively isolated, prior to entry, to ensure there is no incidental water flow into, and through, the pipelines while staff are inspecting and repairing the pipelines. Valley Water also provided adequate safety supplies and equipment for entry personnel, and participated in the site safety meetings to ensure regulatory and Valley Water safety policy compliance. All entries and work within the pipelines were executed without adverse incident.

For further information, please contact Tina Yoke at (408) 630-2385.

## 2. Release of the Central Valley Project Final Cost Allocation Study

On January 14, 2020, the U.S. Bureau of Reclamation (Reclamation) issued a news release announcing the release of the Central Valley Project Final Cost Allocation Study (Study), which determines how to distribute capital construction costs of Central Valley Project (CVP) facilities to project beneficiaries. The CVP's current and interim cost allocation was completed in 1970, with a minor update in 1975. This final cost allocation study defines more clearly the financial obligation of CVP contractors, including Valley Water, as well as the financial obligation of power contractors.

The CVP creates benefits for water supply, flood control, navigation, power, fish and wildlife, recreation, and water quality needs. Costs for water supply and power benefits are reimbursable to

Reclamation and are recovered from CVP water and power contractors through annual rates.

Valley Water, as a CVP water service contractor, is responsible for a portion these costs, including construction costs for the San Felipe Division facilities and other CVP facilities. The Study does not change the amount or timing of Valley Water's payments for San Felipe costs, which will continue to be paid to Reclamation on an amortized repayment schedule through 2036. Valley Water's estimated share of other CVP costs as of 2020 is approximately \$50 million, of which \$44 million has already been repaid. This leaves a balance of about \$6 million to be repaid by 2030.

For further information, please contact Jerry De La Piedra at (408) 630-2257.

### **3. Preview of 2020 Community Events**

Every January, the Office of Government Relations develops a list of community events and festivals for that year where they plan to host a Valley Water booth and/or the water truck. This community outreach provides a valuable forum for Valley Water to communicate with broad sectors of our diverse community on water-related issues, such as water conservation, water recycling and purification, winter preparedness, and Valley Water projects in specific communities, among many others. Many of the festivals included are events where we have hosted an informational booth in the past and have had a high level of visibility due to the size of the crowds. The addition of the water truck, will enable us to continue an even higher level of engagement with the public at these events.

Below are selected highlights of events in which Valley Water is planning to participate in 2020. The full proposed event list is included in this week's non-agenda packet. As always, the Board is encouraged to add additional events they become aware of.

2020 Community Events Highlights:

- March 29, Morgan Hill Wildflower Run
- April 11, Campbell Bunnies and Bonnets Parade
- April 25, City of Palo Alto Great Race for Saving Water and Earth Day
- May 2020, Campbell Chamber of Commerce Boogie on the Avenue
- June 2020, Sunnyvale Chamber of Commerce Art and Wine Festival
- July 4, July 4th Fun Festival at Almaden Lake Park
- July 4, 4th of July Rose, White, and Blue Parade
- July 24-26, Gilroy Garlic Festival
- August 2020, National Night Out
- September 2020, Mountain View Chamber of Commerce Art & Wine Festival
- September 2020, Morgan Hill Chamber of Commerce Taste of Morgan Hill
- October 2020, Day on the Bay Multicultural Festival
- October 2020, Prusch Farm Park Mountain Music Festival
- October 2020, Day in the Park hosted by the City of San Jose, District 8
- October 2020, Diwali Festival of Lights in Cupertino
- December 2020, Santa Visits Alviso

#### 4. X-Band Radar Ribbon Cutting and Media Event

Valley Water joined local, regional, state, and federal agencies to unveil the first permanent X-Band radar in the San Francisco Bay Advanced Quantitative Precipitation Information (AQPI) System at a ribbon cutting and media event on January 15, 2020, at the Penitencia Water Treatment Plant in East San Jose. This event attracted several local news stations including channels 2 KTVU, 4 KRON, 5 KPIX, 11 NBC Bay Area along with KCBS radio, and was attended by more than two dozen regional leaders with a focus on this effort. This placement of X-Band radar is the cornerstone in a new network of high-resolution, low-elevation radars that will improve weather forecasting of atmospheric rivers and extreme weather events across the region.

The system will provide improved data for forecasting, which will assist water managers, reservoir operators, wastewater plant managers, flood, and emergency responders to make operational and safety decisions during extreme weather events. Valley Water CEO Norma Camacho emceed the event and Director Santos provided remarks, along with key speakers from partner agencies.

Two more X-Band radars are slated for installation during 2020 by the following agencies:

1. San Francisco Public Utilities Commission at Montara Mountain in San Mateo County, and
2. East Bay Agencies Partnership at Rocky Ridge near the Las Trampas Wilderness.

For further information, please contact Rick Callender at (408) 630-2017.

**TO:** Board of Directors**FROM:** Michele King, Clerk of the Board**SUBJECT:** Response to IBMR 20-0001-List of Public Records Act Requests Received During 2019**DATE:** 1/21/2020

---

Attached is the list of Public Records Act Requests received during calendar year 2019 as requested by Director Kremen in IBMR-20-0001.

Please note:

- There are gaps in the numbering sequence because the same log is used to track subpoenas and various other types of service requests. Only requests for public records have been included in this list.
- The log does not include requests for documents which were wholly referred to another entity (such as requests for documents concerning residential water service which our agency does not provide, which were referred to the appropriate retailer). There were 166 such requests.

Year	Records Request Number	Description of Material Requested	Requestor
2019	4074	I am requesting a file review for the following addresses & APNs in Santa Clara County: Address range: 900-950 Alta Avenue Mountain View, CA 94043 Parcel: 11609140 We are specifically requesting all information regarding well destruction records and additional information about USTs, hazardous materials/waste, releases, investigations of soil/groundwater/soil gas/indoor air, and remediation efforts at this site.	Michael Behrend
2019	4075	Wanted to see if you can help us track down any active records or permits on the well for 2600 De La Cruz Boulevard in Santa Clara. Attached is the invoice showing the well number / meter number.	Chris Mayfield
2019	4076	I am an artist and lecturer at Stanford, currently working on a research project about Calabazas Creek. One of the things I'm looking for is information on the re-routing of the creek -- I believe in the 1950s or 60s -- in the vicinity of Wilcox High School. From what I can tell, Calabazas Creek originally joined Saratoga Creek, and afterwards was redirected straight toward the Guadalupe Slough. I was wondering if you happen to have any maps, photos, or any other relevant information about this re-routing, especially regarding the construction of the new concrete waterway.	Jenny Odell
2019	4077	Results of ITB 4934-KG	Larry Suezaki
2019	4078	Respectfully request copies of all submitted proposals and any resulting contracts related to RF-PRO-FY17-0005 Planning and Development Integrated Platform (PDIP) issued July 2016 1/8: I apologize, the RFP number that I sent you was incorrect. The correct RFP was #4876 for Enterprise Resource Planning and Implementation Services issued April 5, 2018.	Angie Price
2019	4079	Please send me all well reports and water reports for 2340 Willow Springs Road, Morgan Hill and 17880 Oak Glen Avenue, Morgan Hill? I have listings coming up on both properties and need to find out more about the wells or water on these properties.	Robert Jamison
2019	4080	Can you please provide me with the Bidding Sheets for all bidders for ITB NO. 4923.	Sara Hack
2019	4081	Pursuant to the Public Records Act, I am requesting a list of all members of the Leadership Team and the amounts of merit increase each received this past month.	Mh Baratz

2019	4082	Results of the District's public perception polls taken in June 2017 and June 2018	Jennifer Hampton
2019	4083	The Building Industry Association of the Bay Area (BIA Bay Area) requests notice of any action to adopt or increase a fee or charge as described in Gov't Code 66013 (sewer or water connection or capacity.) BIA also requests to be notified when your municipality makes public its annual Mitigation Fee Act or AB1600 report. (Report contents are described in Gov't Code Section 66013(d).) In addition, BIA requests notice of any action to adopt or increase a fee or other charge related to stormwater/drainage facilities or services.	Building Industry Association of the Bay Area (BIA)
2019	4084	Copies of as-built drawings for Guadalupe Bypass 2 & 3 (facility 3015) in the general vicinity of Arena Green Park in downtown San Jose. A copy of the recorded document for the District easement in this area.	Dave LaVelle
2019	4085	We would like to request a copy of the competitive bids. (4941-KG)	Clifford Raynes
2019	4086	I am part of the consultant team that is working on the feasibility work for acquisition of the Pacheco Res/Dam. I was wondering if there are electronic copies of previous work done for the San Luis Low Point Problem done in the early 2000s that discuss possible Pacheco Res dam sites. I have a copy of the reference June 2003 Calfed Bay-Delta Program San Luis Reservoir Low-Point Improvement Project Draft Alternatives Screening Report. The 2003 report makes reference to a 1993 Wahler report on possible dam sites. Can I get copies of the Wahler report and any other related Low-Point problem consultant reports. The 2003 report does not go into any detail on proposed dam sites. I do remember there was a later report as a follow up to the 2003 report that did have specific info on the proposed dam sites.	James L. Nelson
2019	4087	1. Daily Flow from October 1, 2006-September 30, 2017 for the following locations 5082 Coyote Creek at Madrone 5007 Coyote Creek at Coyote Ranch Road (Low Flow Only) 5010 Fisher Creek at Monterey Rd. 5090 Coyote Ck Pond Elevation 5089 Coyote Ck below Coyote Perc. Pond-Low Flow Only 5058 Coyote Creek at Edenvale 2. Daily Storage from October 1, 2006-September 30, 2017 for Anderson and Coyote Reservoirs	Jeff Micko
2019	4088	Daily Historic Rainfall from Uvas reservoir sensor in inches from January 1980 to January 1994.	James L. Nelson
2019	4089	Can you please provide the most recent (or just relative recent) invoice paid by SCVWD for the HDR Construction Management team services for the Rinconada Water Treatment Plant Upgrade?	Kyle DeBacker

2019	4090	I have already reached out to the agencies with the hazmat records, I am just looking for wells and septic tanks for this request. 2323-2391 Moorpark Avenue, 282-01-014, 282-01-015, 282-01-016, 282-01-022, 282-01-023, 282-01-024, 282-01-025	Cody Johnson
2019	4091	Could you email me a PDF of the District's complaint against the State Water Resources Control Board?	Thomas E. Moylan
2019	4092	I am contacting you on behalf of Paint BidTracker in regards to a project that bid January 8th for the Rebuild Turbine Drive in Clarifier #4 Project. Project Number: 4929. If you would be able to provide the preliminary bid results or any award date information that might be available, it would be very helpful. I could not seem to locate this information on your provided webpage.	Destiny Johnson
2019	4093	Could you please provide me a copy of the report sent to the City of San Jose by Afshin Rouhani on design concepts for Singleton Road crossing of Coyote Creek?	Richard McMurtry
2019	4094	Information on water quality and the water purification plant, plus a connection to answer some questions.	"Henry"
2019	4095	Please email a copy of the complaint filed in Santa Clara County Superior Court referenced in this new release: <a href="https://www.valleywater.org/news-events/news-releases/water-district-files-suit-protect-water-supply">https://www.valleywater.org/news-events/news-releases/water-district-files-suit-protect-water-supply</a>	Alexis Krieg

2019	4099	Can you please send me the bid tabulation sheet for RFP- 4941 (Cisco Aironet) which was due on 12/27/2018.	Akshit Mahajan									
2019	4100	The Santa Clara Valley Water District commissioned a study of the Coyote Creek watershed, and how to mitigate flood risk along the creek's various reaches. This document used to be hosted at <a href="http://www.valleywater.org/services/coyotecreek.aspx">http://www.valleywater.org/services/coyotecreek.aspx</a> , but it is no longer. I've reviewed every doc I could find linked to those pages but could not find the one I was looking for. Unfortunately, I cannot remember the name of the document or study, but it included an analysis of each of the reaches of Coyote Creek, evaluated their flood risk, and proposed various solutions to mitigate the risk. For example, for Reach 13 it proposed a few options including building levees, constructing a bypass channel, or paving the creek to allow for more flow, among potentially other solutions. I hope this helps identify the document in question.	Colby Waterland

2019	4126	I have a plot in Jesse Frey community garden. Since this is in the flood plain for the old Almaden quicksilver mines. I wonder if soil tests were ever done for this garden, and/or any other community gardens? I have been communicating with the city and have had some success. I received an Environmental Site Assessment from February 2006. They indicated that a soil analysis was done, but they couldn’t find it. They suggested that since Santa Clara Valley Water District is the owner, that you did the test and may have the records.	John Shirley

2019	4167	<p>Pursuant to the provisions of the California Public Records Act (Gov. Code, §§ 6250 et seq.), please make available for inspection and copying all documents produced by or otherwise in the possession, custody, or control of the Santa Clara Valley Water District (“SCVWD”) pertaining to Gary Kremen’s communications with the Coalition for a Sustainable Delta, Westlands Water District, and the Delta Conveyance Finance Authority’s (“DCFA”), dated from November 1, 2018 to the present. By “documents” I mean all letters, memoranda, electronic mail (“e-mail”) communications, text messages, reports, analyses, notes, maps, diagrams, ordinances, resolutions, findings, photographs, draft documents, notices, or other written or recorded materials pertaining to the requested topic and in the possession, custody or control of SCVWD. Documents located in employee personal accounts, or otherwise personally retained by an employee, are considered to be in custody of [agency] and must be included. (City of San Jose v. Superior Court (2017) 2 Cal.5th 608, 623.) This request is made pursuant to the California Public Records Act. (Gov. Code, §§ 6250, et seq.) The request is also made pursuant to Article I, section 3(b) of the California Constitution, which provides a Constitutional right of access to information concerning the conduct of government. Article I, section 3(b) provides that any statutory right to information shall be broadly construed to provide the greatest access to government information and further requires that any statute that limits the right of access to information shall be narrowly construed. SCVWD must provide access to its records unless the records fall within one of the specific exemptions enumerated in the Public Records Act. (State of California Ex. Rel. Division of Industrial Safety v. Superior Court (1974) 43 Cal.App.3d 778, 783.) The overarching policy of the Public Records Act favors disclosure, and a refusal to disclose information can only be based on specific exceptions enumerated in the Act. (Lorig v. Medical Board (2000) 78 Cal.App.4th 462, 467.) If SCVWD believes any of the records are exempt from disclosure by the Public Records Act and withholds any documents, then the agency must notify the requestor that some documents were withheld and provide the exemption(s) that justified withholding the documents. (See Gov. Code, § 6255; Haynie v. Superior Court (2001) 26 Cal.4th 1061, pp. 1072-74.) SCVWD is obligated to make the records “promptly available,” as well as to promptly respond to the individual making the request. (Gov. Code, § 6253.)</p>	Barbara Barrigan-Parilla

We need to make sure our quotes are in-line with our marketplace.	Corby Brassett

2019	4180	<p>I just attended their bicycle and pedestrian meeting as a member of the public. One item of concern in the meeting was the removal of the Freedom Bridge (sometimes casually referred to as the "Intel Bridge," location linked), scheduled for September of this year. This pedestrian and bicycle bridge is popular with people who work at Intel and nearby businesses, to access the San Tomas trail for commuting and for lunchtime exercise, and many will be sorry to see it go. Those who have contacted the Water District or read the memos on the subject have learned that the bridge will be removed because it is deficient in three respects:</p> <ul style="list-style-type: none"> <li>• Flood risk,</li> <li>• ADA compliance,</li> <li>• and structure.</li> </ul> <p>However, we have seen no details behind any of these three points. I am writing to request the report(s) or assessment(s) listing the reasons and evidence leading to these conclusions, and the manners and degrees in which the bridge is deficient. I'm also interested to see anything exploring options of remedying the deficiencies, whether technical or during board or committee discussions leading to the decision.</p>	Elizabeth Megas

2019	4210	I would like the as-built drawings for the energy dissipater structure at the mouth of Upper Silver Creek where it meets Coyote Creek. It looks like it is located at Valley Water Fee ID number 49426011, and the parcel may have a deed number of 3749087. Geographic coordinates for the energy dissipater are 37°17'44.5"N 121°49'14.3"W. I believe it was constructed in about 1970, if that helps.	Eric Donaldson

2019	4211	The policy and procedures pertaining to the processing of requests for public records; sample language used when discussing costs with customers.	Marc A. Zeppet
2019	4212	I'm writing to see about the availability and request of the following datasets: Stream Gauge (stage and flow rate). Alert Gauge 1498 Coyote Creek at Madrone (Station 5082) for period of record 1988 - present (primarily interested in hourly data). Precipitation. 2073 Anderson Reservoir (Station 6041) for period of record 1950 - present (primarily interested in daily measurements). 2075 Coyote Reservoir (Station 6021) for period of record (Primarily interested in daily measurements). I was also wondering if there was any record of when the outflow valve at Anderson Dam is open or not. Again, my research is focused on the probabilistic modeling of multi-hazard/compound flood risk (in this case, driven by earthquake and precipitation hazards) in a changing climate. We're in the process of developing models to evaluate both the probability of dam overspill driven by the temporal variability in precipitation with probabilistic models of ground shaking. It is our hope to provide some insight into the compound risk from multiple hazards into the future at Anderson Dam.	Katherine (Katy) Serafin

2019	4272	I am particularly interested in hourly data (or shorter increment) for rain gauges in the NE S.C. County for December 1955 in and around the greater Alameda Creek Basin as described below. If you happen to run across daily rain gauge data in and around that watersheds (those sub-watersheds), that would be helpful also. We only have daily readings done by Lick Observatory and Gerber Ranch in these areas.  Background: Our office is performing comprehensive hydrologic calculations for the greater Alameda Creek basin for the December 16-28, 1955 storm period, and in particular, the storm of December 21-24. We managed to get a hold of hourly data in northeastern Fremont, western San Ramon, and the downtown SJ gauge, but are lacking such information for the Arroyo Hondo, Arroyo Del Valle, Alameda Creek (southern branch), and Arroyo Mocho watersheds. I am guessing that this information, if not in the databases, could be in a storm/storm flooding file as large flows also occurred in Santa Clara County as well.	Frank Codd

2019	4281	It seems it has been unilaterally decided that it was ok to 'dry out the lower basin' using a motorized pump 24X7 over a multi-week period. This is in a neighborhood that motorized leaf blowers are banned. This is in line with the continued environmental, economic, health and social impact the Water Treatment Plant has imposed on the Rinconada neighborhood without any accountability. Please provide [attorney] (CC'ed) with, A copy of the environmental impact report conducted on behalf of the town and people of Los Gatos for the current project. A detailed explanation of the lower basin work that is currently underway. The agreement, legislative or otherwise with the town of Los Gatos that authorized a motorized pump can run 24X7 for multiple weeks as part of 'normal district operations'. A ledger of all cases I've reported to the Water district over the past ~5 years and the associated outcome. Meeting minutes from all public meetings, the committed deliverables agreed to in those meetings. I'd like to understand the projects current budget position - as you are a public benefit company, I'm assuming this is public information.	John Kenevey

2019	4282	<p>There is a culvert located at 2005 Mandelay Pl, San Jose. The culvert is located along the roadside of Yerba Buena Road, transferring runoff water from one side of Yerba Buena to the other. This culvert may have been installed back in 1995, or sooner. I'm seeking any details or records regarding the installation of this culvert - when it was installed, for what purpose was it installed, by whom, etc... Is this something that is required? Is it maintained by the city?</p> <p>It was my understanding based on the municode, permits to build a culvert are required by the Santa Clara Water District.</p> <p><a href="https://library.municode.com/ca/santa_clara_county/codes/code_of_ordinances?nodeId=TITCCODELAUS_DIVC12SULADE_CHISU_ART5IM_PT3IMPLTRDR_SC12-184SAESRE">https://library.municode.com/ca/santa_clara_county/codes/code_of_ordinances?nodeId=TITCCODELAUS_DIVC12SULADE_CHISU_ART5IM_PT3IMPLTRDR_SC12-184SAESRE</a></p> <p>Would you have record of any such permits?</p>	Stacy Martin

2019	4289	<p>I request access to records received, kept, or maintained by the Santa Clara Valley Water District (“SCVWD”) relating to any studies of fish populations or fish habitat conducted by or in the possession of SCVWD that concern any waterbody over which SCVWD has jurisdiction in Santa Clara County downstream of one of SCVWD’s 10 major dams and reservoirs, excluding the Uvas-Llagas Watershed. Specifically, Baykeeper requests any and all studies related to fish populations or fish habitat conditions, including but not limited to monitoring and research reports, documentation resulting from fish sampling and/or monitoring efforts, and research and assessments of fish populations, population dynamics, and/or habitat conditions. Please limit the geographic scope to exclude documents that solely pertain to the Uvas-Llagas Watershed. Additionally, please exclude any document that solely pertains to a waterbody upstream from one of SCVWD’s 10 dams, the Almaden, Anderson, Calero, Chesbro, Coyote, Guadalupe, Lenihan, Stevens Creek, Uvas, and Vasona dams. By “waterbody,” Baykeeper means any waterbody over which SCVWD has jurisdiction, including but not limited to streams, lakes, rivers, reservoirs, and ponds. This request includes, but is not limited to, studies referenced in or contributing to study elements described in the document produced by Santa Clara Valley Water District titled “Fisheries and Aquatic Habitat Collaborative Effort – Summary Report” (January 6, 2003) (“Summary Report”), attached here as Attachment A. To this end, please include the following specific documents in addition to any other documents that are responsive to Baykeeper’s PRA request:</p> <ol style="list-style-type: none"> <li>1. The Fisheries and Aquatic Habitat Collaborative Effort (FAHCE) Fish Habitat Management Plan (FHMP) and the “existing extensive research on anadromous fish and fisheries management” and “existing mapping of habitat and species conducted by [SCVWD]” relied on by the Technical Advisory Committee (TAC) in developing this FHMP. 2019	4353	I am a student at the University of Virginia. I am a part of a research group that is debunking the assumption that urban growth requires more water. The city of Santa Clara is a great example of this, so I was wondering if I could have access to some water utility data as well as a breakdown of how Santa Clara was able to reduce its water consumption by the percentage that it did. I am specifically interested in the city of Santa Clara Water Department's water utility data. I am looking for data dating back to the year 1990 to present day, regarding: 1.) total population served by the Santa Clara Water Department each year 2.) total volume pumped or diverted into water-delivery system, by year 3.) total volume delivered to all water utility users, by year 4.) total volume delivered to residential users, by year 5.) total leakage volume ("non-revenue water"), by year I have attached an excel sheet with the information I am looking for if you are willing to fill it out. 2019	4383	I'm looking for records for two groundwater monitoring wells that were installed in approximately April-May 1988 time period at a former dry cleaner site in Mountain View. The wells were numbered MW-1 and MW-2. Three additional wells, numbered MW-3 to MW-5 were installed at the site in November 1989, but I already have the DWR Water Well Drillers Reports for those wells. The name/address of the site is as follows: Sunbeam Cleaners 128 N Rengstorff Avenue Mountain View. I've attached a map file including a topo map, APN map, and Google Earth image depicting the site, including the specific "128 building" in the subject shopping center around which the wells were installed. The wells no longer appear to exist, but I understand from an available report that they were installed on the northeast and southwest sides of this building. If available, I'm looking for well permits and/or Water Well Drillers Reports for MW-1 and MW-2.	Philip McLaughlin

2019	4407	<p>Following is a request for public records. Please feel free to contact me if you feel this request needs clarification. Time is of the essence in receiving this information and I request that you provide it promptly. Please provide team organizational charts, individual consultant resumes, individual consultant qualification descriptions, and any other individual consultant qualifying information, as applicable, contained within statements of qualifications or proposals received for the following project. In addition, please provide copies of any attendee sign-in sheets for pre-proposal meetings or site visits. I am requesting information for <u>all</u> teams or individual consultants          RWTP Reliability Improvement Project Inspection Services (RFP) CAS File No. 5022. Please provide this information in an electronic format.</p>	FOIA 12345
2019	4408	<p>My name is Frank Klinger representing Roadrunner Transportation Systems investigating a rather old claim involving a shipment from Warehouse 69 in Davie FL. The shipment consisted of 2 boxes of NES V801 AVT consigned to Valley Water, 5905 Winfield Blvd, San Jose CA delivered 12/05/17. The only information I have identifying the shipment is a bill of lading number 28987 and a REF#25180418 which may only pertain to internal info for the shipper.          There is a question as to exactly what was shipped and what was delivered that date and I was hoping your records could shed some light on this situation. Is there anything in your records reflecting the receipt of this shipment – number of pieces, description of what was delivered, etc.          I realize this is quite old but would certainly appreciate any assistance in resolving this high value claim.</p>	Franklin Klinger
2019	4409	<p>I would like to request any available records pertaining to 2108 North 1st Street in San Jose. This facility used to be an auto dealership, and the removal of USTs back in the 1990s was overseen by the SCVWD. Any records regarding this removal and any other hazardous substance records would be helpful.</p>	Claire Neal
2019	4411	<p>Thank you for the RFP information that I requested. Can you please provide the submitted proposals for that same RFP (CAS 4938)? At a minimum, we would like a copy of the proposal submitted by the successful proposer, but we prefer to see each proposal that was submitted</p>	David Mitchell
