

Appendix E - Feasibility Studies

Projects listed in the Feasibility Studies appendix are potential future capital projects. Operations staff is collecting data and analyzing alternatives to determine if a capital investment is a cost-effective solution. After completion of a feasibility study, these projects will be validated before they are identified as capital projects, and considered for addition to the CIP.

Feasibility Studies

Project Name	Water				
	Water Supply	Flood Protection	Resources Stewardship	Buildings & Grounds	Information Technology
Ogier Ponds Separation from Coyote Creek			X
